

# Training

In accordance with the training plan for the Ordinance on Basic Vocational Training for Computer Scientists EFZ, we offer practice-oriented training courses in the fields of business informatics, systems engineering and platform development, ICT specialists and application development.

## Training plan

### Expertise in platform development

Competence area	Professional competences							
<b>A: Accompanying ICT projects</b>	<b>A1:</b> Clarify and document the needs of stakeholders in the context of an ICT project	<b>A2:</b> Determine the process model for an ICT project	<b>A3:</b> Research information on ICT solutions and innovations	<b>A4:</b> Plan ICT projects and the resulting tasks according to the process model	<b>A5:</b> Visualise and present variants for ICT solutions	<b>A6:</b> Check and report on the progress of ICT projects and the resulting tasks according to the process model	<b>A7:</b> Hand over ICT solutions to the customer and finalise the project	
<b>B: Supporting and advising in the ICT environment</b>	<b>B1:</b> b1: Set up your own ICT workplace	<b>B2:</b> Receive and process complex ICT support requests	<b>B3:</b> Advise customers on data protection and data security	<b>B4:</b> Plan, install and operate network-bound data storage systems				
<b>C: Creating and maintaining digital data</b>	<b>C1:</b> Identify and analyse data and develop data models	<b>C2:</b> Implement data models in a digital data store	<b>C3:</b> Plan, implement and document data security and data protection for ICT solutions	<b>C4:</b> Process data from digital data repositories				
<b>D: Delivery and operation of ICT solutions</b>	<b>D1:</b> Recording, standardising and automating ICT processes	<b>D2:</b> Define the delivery process for ICT solutions	<b>D3:</b> Prepare execution platform for ICT solutions	<b>D4:</b> Putting ICT solutions into operation				
<b>E: Operation of networks</b>	<b>E1:</b> Planning and documenting networks	<b>E2:</b> Select and commission network components	<b>E3:</b> Maintain and further develop networks	<b>E4:</b> Implementing, documenting and checking the security of networks	<b>E5:</b> Analyse, optimise and document the performance of a network	<b>E6:</b> Monitor networks		

<b>F: Operating server systems and server services</b>	<b>F1:</b> Planning and documenting server systems and services	<b>F2:</b> Putting server systems into operation	<b>F3:</b> Commissioning server services	<b>F4:</b> Maintain and manage server systems and services.	<b>F5:</b> Monitor server systems and services	<b>F6:</b> Implement, document and verify the security of server systems and services	<b>F7:</b> Plan and implement the availability of server systems and services	<b>F8:</b> Create and implement backup and archiving concepts for data

## System technology competences

Competence area	Professional competences					
<b>A: Commissioning of ICT devices</b>	<b>A1:</b> Select and commission user terminals	<b>A2:</b> Selecting and commissioning server systems	<b>A3:</b> Selecting and commissioning network components			
<b>B: Planning, setting up and configuring networks</b>	<b>B1:</b> Planning and setting up networks and their topology	<b>B2:</b> Planning and setting up network security and performance	<b>B3:</b> Monitor networks and ensure their security and performance	<b>B4:</b> Plan, install and operate network-bound data storage systems		
<b>C: Planning, setting up and configuring servers</b>	<b>C1:</b> Planning and commissioning directory services and shares	<b>C2:</b> Commissioning and configuring advanced server services	<b>C3:</b> Commissioning and configuring communication services and services to support work in a group (groupware)	<b>C4:</b> Create and implement data backup, system backup and archiving concepts	<b>C5:</b> Provide services via the network and take the necessary security precautions	
<b>D: Maintaining networks and servers</b>	<b>D1:</b> Maintaining and developing networks	<b>D2:</b> Maintaining and administering servers	<b>D3:</b> Maintain and administer user terminals	<b>D4:</b> Record, standardise and automate ICT processes	<b>D5:</b> Plan, commission and use distribution systems for applications	
<b>E: Working in projects</b>	<b>E1:</b> Prepare, structure and document work and assignments systematically and efficiently	<b>E2:</b> Collaborate in projects	<b>E3:</b> Communicate in projects in a targeted and personalised manner

## Professional competences in business informatics

Competence area	Professional competences			
<b>A: Commissioning ICT devices</b>	<b>A1:</b> Select and commission user terminals	<b>A2:</b> Set up mobile user terminals and synchronise them via the company network	<b>A3:</b> Connecting and configuring peripheral devices	
<b>B: Commissioning server services and networks</b>	<b>B1:</b> Commissioning server systems	<b>B2:</b> Setting up networks and their topology	<b>B3:</b> Create and implement data backup, system backup and archiving concepts	

Competence area   Professional competences				
<b>C: Ensuring ICT operations</b>	<b>C1:</b> Maintain and further develop networks	<b>C2:</b> Maintaining and administering servers	<b>C3:</b> Plan and commission directory services and shares	<b>C4:</b> Commissioning and configuring communication services and services to support work in a group (groupware)
<b>D: Supporting users</b>	<b>D1:</b> Instruct and support users in the use of IT resources	<b>D2:</b> Take on support tasks with customer contact and solve problems on site.		
<b>E: Working in projects</b>	<b>E1:</b> Prepare, structure and document work and assignments systematically and efficiently	<b>E2:</b> Collaborate in projects	<b>E3:</b> Communicate in projects in a targeted and personalised manner

## ICT specialist competences

Competence area   Professional competences				
<b>A: Commissioning ICT devices</b>	<b>A1:</b> Install, configure and maintain ICT user terminals and their operating systems	<b>A2:</b> Installing and configuring standard applications	<b>A3:</b> Carry out and analyse functional tests	<b>A4:</b> Using automation scripts
<b>B: Ensuring the operation of networked ICT user terminals</b>	<b>B1:</b> Connect network-compatible peripheral devices and associated services to the network infrastructure and rectify faults	<b>B2:</b> Connect ICT user terminals to server services and rectify faults	<b>B3:</b> Ensure the security of ICT user terminals	
<b>C: Support users in the use of ICT resources</b>	<b>C1:</b> Instruct and support users in the use of ICT resources	<b>C2:</b> Create and customise instructions and checklists for users	<b>C3:</b> Advise and support customers in the procurement of ICT user terminals	
<b>D: Handling ICT support work</b>	<b>D1:</b> Deal with customer concerns in first-level support and second-level support	<b>D2:</b> Behave appropriately when dealing with customers and in a team	<b>D3:</b> Carry out work in an ICT environment according to specific methods and participate in projects
